

CMD ❖❖❖ BookingModel

BookingModel.com — Command Document (CMD)

Version: 2.0 | **Date:** August 2026 | **Owner:** VEA Group — VEA Tech
Status: Demo Live · Production Build Pending

1. PRODUCT OVERVIEW

BookingModel.com là marketplace booking **KOL/KOC thực chiến** — kết nối brand và agency với food & lifestyle creators đã được vet thủ công. Không phải platform tự đăng ký, không có thuật toán — **VEA curate từng creator**.

Positioning: - Public site: brand khám phá creators, xem portfolio, đăng ký hợp tác - Brand dashboard (sau login): xem contact info đầy đủ, gửi brief, track deal - Admin internal: quản lý toàn bộ creator database, import Excel, review applicants, manage deals

2. FILE DELIVERABLES (Session này)

File	Mô tả	Path
bookingmodel_public_v3_final.html	Public site hoàn chỉnh — 40 creators với ảnh Unsplash, portfolio, login brand	/mnt/user-data/outputs/
bookingmodel_internal_v2.html	Admin internal dashboard — deals, applicants, Excel import, hợp tác requests	/mnt/user-data/outputs/

3. TÍNH NĂNG — PUBLIC SITE

3.1 Creator Marketplace

- Browse 40 creators với ảnh portrait thật (Unsplash)
- Filter theo: All / Lifestyle / Beauty / Fitness / Food & Bev / Tech / Fashion / Home & Family
- Mỗi card: ảnh, tên, handle, niche, followers, ER, rate estimate
- Click card → **Creator Detail Modal**: ảnh header, stats bar (followers/ER/rate/platform), portfolio 4 ảnh, nút “View on TikTok/YouTube”, nút “Contact Creator”

3.2 Brand Login

- Nút “Sign in” → modal login

- **Demo:** admin@demo.com / 123456
- Sau login → **Brand Dashboard** inline (không redirect file khác)

3.3 Brand Dashboard (sau login)

- **Browse Creators:** grid 40 creators với **contact info hiện ra đầy đủ** (email/link liên hệ thật)
- **My Campaigns:** placeholder, sẵn sàng production
- **Saved Creators:** placeholder
- **Settings:** form cơ bản
- Search real-time theo tên/niche/platform
- Nút “View Profile” → URL TikTok/YouTube thật
- Nút “Portfolio” → mở detail modal với 4 ảnh portfolio

3.4 Creator Registration (Public Form)

- Form “Apply as Creator” → gửi data lưu vào `localStorage('bm_applicants')`
